Methodological recommendations: When writing an abstract, attention should be paid to the correspondence of the content to the topic of the abstract. In order to fulfill this requirement, it is recommended to draw up a plan of the abstract, discuss it with the teacher.

Mandatory structural elements of the abstract are the title page, the table of contents indicating the pages of sections, introduction, main part, conclusion, list of references. At the discretion of the author, a list of accepted abbreviations and appendices is included.

The volume of the abstract depends on the chosen topic, the degree of elaboration of the topic in the scientific literature, as well as on the author himself, but in any case it should be at least 15 pages. When making an abstract, the following field sizes are observed: left - not less than 20 mm, right - not less than 10 mm, upper and lower - not less than 20 mm. When typing text in electronic Word editors, it is necessary to use the Times New Roman font, font size 14, line spacing 1.5.

In case of difficulties in the design of quotations or literature, it is recommended to refer to the requirements of GOST.

The abstract is performed in English.

The abstract assumes a deep analysis of the theory and its connection with practice. Therefore, the abstract should reflect the main theoretical provisions of this topic with reference to information sources, analysis of these provisions, comparison of different points of view, formulation of conclusions. The author's conclusions should be reasoned.

When writing a paper, the author should rely on the most well-known works on the research topic, paying special attention to periodic publications. In order to get the highest scores, the originality of the text should be 70% or higher.

VIII. THE LIST OF PEDAGOGICAL AND INFORMATION TECHNOLOGIES USED IN THE IMPLEMENTATION OF THE EDUCATIONAL PROCESS IN THE DISCIPLINE, INCLUDING A LIST OF SOFTWARE AND INFORMATION REFERENCE SYSTEMS

When studying the discipline, it is necessary to be guided by international treaties, the Constitution of the Russian Federation, current federal laws and by-laws.

Successful study of this discipline is possible only with the proper organization of the student's independent work. It is recommended to use the system "Guarantor" and "Consultant plus" in preparation for the answer to get acquainted with international treaties, laws and regulations. In order to consolidate the acquired knowledge and check the level of training of the student on a specific topic of the discipline, it is necessary to answer the control questions formulated in the working program and, if necessary, return to additional study of specific issues of the topic.

The student should understand that only he himself, independently, through conscientious assimilation of the content of educational and additional literature, the meaning and content of the legal norms themselves and the practice of their application, through thoughtful and conscientious preparation for classes, can acquire solid and in-depth knowledge of the discipline, which is necessary not only for obtaining knowledge that meets the requirements of higher education, but also for their practical application.

The educational process involves the use of the following interactive teaching methods and information technologies: working in small groups, interactive presentation, drafting and analysis of legal documents, multimedia presentations, modeling of legal situations.

When conducting classes, information technologies are used, in particular reference and legal systems

1. Legal reference system "Consultant Plus" – www.consultant.ru
